

Visual Masking: Studying Perception, Attention, and Consciousness

Visual masking is a technique used in cognitive research to understand pre-conscious processes (priming, for example), consciousness, visual limits, and perception issues associated with psychopathology. This book is a short format review of research using visual masking: how it has been used, and what these experiments have discovered. Topics covered include concepts, varieties, and theories of masking; masking and microgenetic mechanisms and stages of visual processing; psychopharmacological and genetic factors in masking, and more. Provides succinct information about the widely dispersed masking studies and points out some new trends in masking research. Reviews transcranial magnetic stimulation (TMS) as an alternative to the traditional psychophysical masking methods. Comments on the methodological pitfalls hidden in the practice of masking, helping to improve the quality of future research where masking is used as a tool. Informs readers about recent developments in theoretical attempts to understand masking.

Revive your spirit. Restore your body. Discover your style.

Home Salon and Spa Services Employment Contact us

Feel free to make a reservation Open Mon -Thu: 9:00am – 6:00pm | Fri – Sat: 9:00am – 7:00pm

Spa Services

We offer an extensive menu of spa services to restore your body and revive your spirit.

Salon Services

From cut, color, styling, texturizing and extensions, we offer a variety of services to fulfill your needs. Discover your style.

Facial Services

Revive your spirit. Restore your body. Discover your style.

Men's Services

From cut, color, styling, manicures and pedicures, we offer a variety of services to fulfill your needs. Discover your style.
