

Epilepsy: Progress in Treatment (Wiley Medical Publications)

Presents the results of a meeting of neurologists and pediatricians held in Goslar, West Germany in November 1986 in order to discuss the state of the art in the treatment of epilepsy. Contributors discuss the basic mechanisms and classification of epilepsy, diagnosis, drug treatment, new antiepileptic drugs under development, and a review of the comprehensive care of patients with epilepsy. Specific topics covered include synaptic transmission and its relation to epilepsy, seizure types and epileptic syndromes in children, EEG in epilepsy, neuroimaging in epilepsy, differential diagnosis of epilepsy, monitoring drug treatment, side effects, and comprehensive epilepsy service.
