

## Fighting Cancer with Vitamins and Antioxidants

The most up-to-date and complete resource on the powerful benefits of micronutrients for cancer treatment and prevention. Written by the nations leading expert on vitamins and cancer research. Reveals how to maximize the benefits of your cancer treatment program while minimizing the side effects of chemotherapy and radiation. Shows how to counteract the carcinogenic effects of dental X-rays, CT scans, mammograms, cell phones, and other unavoidable hazards of modern life. Provides an easy-to-follow program of nutritional supplements to improve your odds of avoiding and beating cancer. Despite extensive research and the development of new treatments and drugs, the U.S. mortality rate from cancer has not changed during the past several decades. Yet there are promising nutritional ways of avoiding and even beating cancer. In this completely revised and expanded edition, leading anticancer researcher Kedar N. Prasad and doctor K. Che Prasad reveal the latest revolutionary discoveries in the use of antioxidants and micro-nutrients to prevent and treat cancer--and also help with heart disease, Alzheimers, and Parkinsons. Providing a simple nutritional program to follow, the authors show how micro-nutrients, vitamins, and antioxidants can enhance the beneficial effects of conventional cancer treatments, decrease their toxic side effects, improve long-term prognosis, and reduce the risk of new cancer. Explaining how antioxidants regulate gene expression and cancer heredity, the authors detail how to counteract the risks of dental and medical X-rays, CT scans, mammograms, cell phones, frequent flying, and other unavoidable hazards of modern life; reduce the oxidative stress of free radicals in the blood; and decrease chronic inflammation. Reviewing recent studies, they deflate the controversies surrounding the use of antioxidants in cancer treatment, revealing

everything from the reason why many vitamins in foods are destroyed during storage to the surprising role of selenium in cancer prevention.
